26 JAN 1982

MEMORANDUM FOR: Director of Security  
VIA: Deputy Director of Security  
SUBJECT: National Security Council Decision Directive 19

1. Reference is made to the attached memorandum of 26 January 1982, which reflects the views expressed by Bob Gates concerning the implementation of NSDD 19.

2. At this juncture the overall scope of the problem seems to have narrowed considerably, and there would appear to be the following basic assumptions and actions:

°This is a White House program, and it is the role of the Agency to be properly responsive to a Presidential initiative, without overreacting. Presumably the DCI and the DDCI will make this policy absolutely clear within the organization.

°It was neither intended, nor is it deemed advisable to use CIA investigative/polygraph resources outside the Agency in connection with Community leak inquiries. This point should be stressed with the DDA, OGC, the Executive Director, and the DDCI -- as appropriate.

°There will be no massive use of National Security Council cover sheets within this Agency, where [redacted] will serve as the focal point in determining what documents require the use of these new forms. I think Tom will act judiciously in this area.

°There will be a need to properly advise the Agency population concerning policies and procedures in the implementation of NSDD 19. The Policy and Plans Group should work closely with Public Affairs on the development of an Agency notice and we should give some thought as to whether this should be released routinely under the signature of DDA or the DCI. There are risks and benefits on both approaches.

**CONFIDENTIAL**

°Public Affairs will take the lead in modifying Agency regulations [redacted] which will cover the "approval" role of the DDCI on background briefings. There is still room for discussion concerning the role of Security in [redacted] which relates to Agency employees having "contacts" with media representatives.

°The Special Security Center will take the lead, in terms of the Agency, in putting a "freeze" on the printing of Nondisclosure Agreements so that appropriate consideration can be given to the addition of a short paragraph relating to polygraph. The NDAs were at the Agency printers but were recovered on 26 January 1982.

[redacted] as Chairman of SECOM, will address the Community aspects of this program.
